

## Installing Daylite Plug-Ins

Thank you for purchasing one of our Daylite plug-ins.

To install the plug-in please proceed as follows:

1. Close Daylite
2. Copy the \*.bundle file to the Daylite **PlugIns** folder:

*[your user's folder]/Library/Application Support/Daylite/PlugIns*

In case the **PlugIns** folder doesn't exist, please go ahead and create it. The folder name is case sensitive. Please note that the Library folder is hidden in OS X 10.7 Lion. In order to access it click **Go to** in the **Finder** menu and hold down the **[alt]** key. The **Library** folder should now be visible.

3. Restart Daylite.
